

PROFILE

Motivated Computer Science undergraduate with hands-on experience in Python development, cybersecurity, database systems, and full-stack application development. Built real-world projects involving network traffic analysis, secure authentication, semantic job matching, and data-driven applications. Skilled in Python, SQL, Streamlit, Git, PostgreSQL, and cybersecurity fundamentals.

PROJECTS

Cyber Attack Detection System

- Python · PyShark · Streamlit · SQLite · Pandas · NumPy · Threading · Wireshark/TShark
- Built a real-time network packet capture system using PyShark and Wireshark/TShark to monitor live Wi-Fi traffic, extracting features: src/dst ports, protocol, packet size, and TCP flags.
 - Implemented multi-threaded architecture using `threading` + `queue` to run background capture workers without blocking the Streamlit dashboard UI.
 - Applied rule-based threat classification to detect five attack types – DoS, Port Scan, SQL Injection, XSS, Malware – assigning a risk score (0.0–1.0) per packet.
 - Built persistent event logging via SQLite and background JSONL file; stored packets with risk scores and classifications across sessions.
 - Explored a labelled network traffic dataset and trained a scikit-learn classification model for potential future integration into the live detection pipeline.
 - GitHub:** github.com/ItsMeTinku/Cyber-Attack-Detection

Secure Contract Book Python · SQLite · GitHub

- Built a secure legal-tech platform for digital contract verification and tamper-resistant document storage.
- Designed a clean interface for organised contract tracking and efficient workflow management.
- GitHub:** github.com/ItsMeTinku/secure-contract-book

Skill-Job Matching System Python · Data Processing · Streamlit

- Developed a matching platform that aligns candidate profiles with job requirements for faster hiring decisions.
- Delivered a user-friendly Streamlit interface that simplifies candidate evaluation and reduces manual effort.
- GitHub:** github.com/ItsMeTinku/skill-job-matcher

Additional Projects

- web application for the mobile shops · (github.com/ItsMeTinku/smart-hub)
- web application for the Agriculture · (github.com/ItsMeTinku/smart-market-price-analyzer)
- web application for the Salon · (github.com/ItsMeTinku/Salon-Management-System)

EDUCATION

Bachelor of Computer Application – Final Year

Sri Guru Granth Sahib World University
2023 – 2026 · Expected Graduation: June 2026 · Available full-time from July 2026

Senior Secondary – 12th (Non-Medical)

Govt. Senior Secondary School, Bassi Pathana
75%

Secondary – 10th

Govt. Senior Secondary School, Bassi Pathana
100%

SKILLS

LANGUAGES

- Python C C++ HTML
- SQL

FRAMEWORKS & TOOLS

- Streamlit Git & GitHub
- SQLite PostgreSQL
- Supabase VS Code

NETWORK & SECURITY

- Linux CLI Wireshark
- PyShark Packet Analysis
- Npcap/TShark Pandas
- NumPy Scikit-Learn OOP
- DSA Kali Linux
- Threat Detection

CERTIFICATIONS

Cybersecurity Training

Techlive Solutions

HTML Training

Spoken Tutorial, IIT Bombay

Linux Training

Spoken Tutorial, IIT Bombay

Python Programming

Additional Coursework

Data Science Fundamentals

Additional Coursework

SOFT SKILLS

- Problem Solving
- Critical Thinking Teamwork
- Adaptability Time Management
- Self-Motivation

LANGUAGES

- English Hindi Punjabi

INTERESTS

- Cybersecurity
- Network Security Data Analysis
- Cloud Computing Open Source
